Company Profile

Ars Chirurgica s.r.l.

General information

Ars Chirurgica s.r.l., based in San Giovanni in Persiceto (BO) since 1983 operates in Emilia Romagna region as an exclusive promoter and dealer mainly in the field of digestive endoscopy, urology, general and laparoscopic surgery, vascular surgery and radiology and interventional cardiology. Starting 2011 Ars Chirurgica s.r.l. working at national level as an exclusive importer mainly in the field of urology, gynecology, general and laparoscopic surgery.

Ars Chirurgica is structured in two divisions:

- Emilia Romagna Division
- Italy Division

Each division consists of:

- Business Unit Manager,
- Area Manager,
- Product/Clinical Specialist,
- Dedicated Sales force.

The sales force update is guaranteed by a constant flow of information between the company and the sales force, including product news, bibliography and new surgical techniques. Business meetings and theoretical-practical training are regularly organized to guarantee the best service to its customers.

ARS CHIRURGICA provides for each product sold:

- Customer service
- technical information, user manuals, information sheets both on paper and electronic support, videos and bibliography.
- direct assistance in the operating room
- appropriate education of medical and nursing staff on intervention techniques
- consignment stock (to be agreed) service at the operating room of customer, which is regularly supervised and implemented by a representative of the company in collaboration with the authorized personnel of the customer.
- a training program in specialist centers and specific courses for customers.
- possibility to supply specific equipment in a free rental, paid and on-demand rental arrangements.
- After sales service is guaranteed either in the warranty period that afterwards. In case of failure or malfunction, the equipment withdrawal or direct assistance in o.r. usually within 24 hours following the request with the possibility of supplying a replacement device after careful

evaluation. The assistance is always guaranteed by the manufacturer's technicians; in any case, Ars Chirurgica has also activated an agreement with a qualified and certified company for the equipment repair, which is able to do the first operation, where it is deemed appropriate.

- The warehouse ensures the proper storage of medical devices and a quickly delivery. The product is guaranteed from the moment of entry into the warehouse until delivery to the Customer through a series of documented procedures, the traceability of the product through the lot or serial number and the expiration date of the sterility.
